

**Holiday Inn: Oasis Lounge – 30 sec. radio script**

Next to providing an excellent experience in all of our venues, most important to us is the health of our employees and patrons.

Hi, I'm Dave Youngren, general manager of the Holiday Inn.

On May 4, 2011 we opened our all new smoke-free Oasis Lounge.

We were willing to draw the line on secondhand smoke because it has proven to cause cancer and heart disease.

We also found that most people prefer to work and socialize in an environment that has clean air.

It was the right decision for our patrons and employees... and it has not hurt our business.
